

# CHANCELLOR'S WELCOME

Welcome to Lone Star College!

We know you have a choice and we are proud that you have chosen Lone Star College for your higher education needs. Nationally-recognized as a premier community college and leader in higher education innovation, your Lone Star College education will be first rate. You will be joining the more than 69,000 students in credit courses who call Lone Star College home each year.

Lone Star College understands that in today's changing world, education and training have never been more important. That's why at Lone Star College you can earn an associate degree, take classes that transfer to four-year universities, update your current job skills, train for a new profession or take continuing education classes for enrichment. We want you to succeed, and we are here to help you achieve your goal!

After educating students for nearly 40 years, Lone Star College has grown into the largest college in the greater Houston area, and our first rate programs have also made us the fastest-growing community college system in Texas.

The Lone Star College System consists of five comprehensive colleges located across the Houston region, including LSC-CyFair, LSC-Kingwood, LSC-Montgomery, LSC-North Harris, and LSC-Tomball. Each of our colleges has a distinct character and all have outstanding campus facilities. In addition, LSCS has six satellite centers to make educational opportunities even more convenient for students.

As an innovative leader in higher education, Lone Star College added our newest campus LSC-University Park in 2010. LSC-University Park is designed to provide a full spectrum of services from lower level undergraduate classes from Lone Star College to upper level university classes with partners that include University of Houston, University of Houston-Downtown, Texas Southern University and Sam Houston State University. The LSC-University Center at University Park provides students with a seamless transfer process to achieve a four-year college degree. We offer similar upper level university degrees at our LSC-University Center at Montgomery, located in The Woodlands.

Lone Star College System also includes cutting edge online access to classes via LSC-Online, and provides customized workforce training and

development to employers through our Lone Star Corporate College.

Lone Star College puts its students first. Those just aren't words we put on a page.

Those are words we put into action through our total commitment to student success. At Lone Star College classes are small – averaging about 24 students – which gives you personalized attention from the outstanding Lone Star College faculty. And all of the Lone Star Colleges offer mentoring, tutoring and counseling to help you achieve your success.

We also understand that not everyone can be full-time or 9 to 5 student. That's why we hold classes throughout the day, evenings and weekends. And don't forget that Lone Star College provides opportunities for all kinds of possibilities including specialized training for long-term careers in high demand fields, like energy, manufacturing, healthcare and computer technology.

Lone Star College is committed to keeping your education accessible by keeping it affordable. If you need financial aid, our advisors can provide you with a variety of financial aid options including scholarships, grants, work study and more.

Lone Star College is constantly evolving and changing with the needs of the community and prepares students to enter the workforce fully qualified to succeed. You can be assured that you will receive a top-notch education no matter what course of study you choose to pursue. We are also constantly looking for ways to expand our student's experience on campus by continually updating and expanding to accommodate for growth.

It's a great time to attend a Lone Star College. Welcome!

A handwritten signature in black ink that reads "Richard Carpenter". The signature is written in a cursive, flowing style.

**Dr. Richard Carpenter**  
Chancellor

The chancellor is the chief executive officer of the Lone Star College System.
