Kelly R. Bailey is the Director of Partnerships and Alliances for the Education and Career Advancement Services Division at Burning Glass Technologies. Ms. Bailey has been working with real-time labor market data in the education market for close to eight years. Along with spearheading the fast growing Education Division at Burning Glass, Ms. Bailey has presented at over a dozen education conferences in the last year.

Ms. Bailey has also been married for eight years and is the proud mother of two girls, age 5 and 3.

Burning Glass is a labor market analytics firm, which builds technologies to inform the global conversation on education and the workforce. Its tools provide detailed real-time awareness of labor market demand and skills gaps to educators, policy makers, researchers, and employers.

Burning Glass Technologies, a Boston-based labor market analytics firm, has developed technologies to build detailed awareness of what is happening in the labor market in real time. We achieve this by collecting and analyzing job postings from job sites across the internet including job boards, government sites, and employer sites. Our software deploys advanced, proprietary text mining to “read” each job description, allowing us to analyze jobs titles, experience level, educational requirements and even the particular skills that each employer is seeking.

Our tools are playing a growing role in informing the global conversation on education and the workforce by providing researchers, policy makers, educators, and employers with detailed real-time awareness into skill gaps and labor market demand. Burning Glass’s job seeker tools power several government workforce systems and have been shown to have substantive impact on reemployment outcomes and on labor market literacy.

With headquarters in Boston’s historic Faneuil Hall, Burning Glass is proud to serve a client base that spans six continents, including education institutions, government workforce agencies, academic research centers, global recruitment and staffing agencies, major employers, and leading job boards.
