**LoneStarAlert** is the emergency alert notification system for Lone Star College powered by Cooper Notification's Roam Secure Alert Network (RSAN). This service delivers emergency text, email, desktop and voice messages to you anytime there is an emergency on campus that poses a safety concern for the community.

**No spam**
This system is intended for communicating emergency notifications or testing of the system. LSC will not send advertising or non-emergency announcements using this system.

**Types of alerts sent using LoneStarAlert**
Alert types include warnings, watches, and advisories that may include life safety, intruder alerts, fire, weather, accidents involving utilities or roadways, team activation notifications, or disaster notifications.

**Other ways to stay informed**
- Go to the [LoneStar.edu](http://www.lonestar.edu) website. During high alert periods when closures are a possibility, the Lone Star College website home page will display notifications, instructions and updates with the latest status information.
- Check your [LoneStar.edu](http://www.lonestar.edu) or [my.LoneStar.edu](http://my.lonestar.edu) email. You will automatically receive email messages to your official LoneStar email address.

LoneStarAlert User Instructions

Individuals within the Lone Star community are encouraged to create a profile through self-registration. Self-registration is available to anyone interested in receiving LoneStarAlert messages. Using the instructions below, a user may register as a “New User”. Self-registration enables a user to select emergency alerts from one or more locations and in multiple languages. The information you provide is only used for LoneStarAlert messages and testing. Your information will not be used for other purposes. Users may also select local weather, travel and amber alerts, national news alerts, and general Lone Star College messages.

Accessing LoneStarAlert

You may also access LoneStarAlert by entering https://LSCSalert.LoneStar.edu in your web browser address bar.

LoneStarAlert Home Page

To create a profile select “New User”.

Figure 1. LoneStarAlert Home Page
After completing your self-registration, your profile page will display (a view of your information as entered). You may send a test alert to all your devices. You may also edit your profile, devices, and the alerts you want to receive. You can revise your profile at any time by logging into your LoneStarAlert account.

For assistance contact the LoneStarAlert help desk at LoneStarAlert@LoneStar.edu or call 281.290.3667.
