\$20 (lunch included)

To register:

LoneStar.edu/Professional-Seminars

For more information:

Michael.Burns@LoneStar.edu

In this non-technical seminar, learn the basics of the energy industry from an economic and geopolitical perspective, including the role of electricity production and alternative energies in the United States.

Get the answers to questions like:

- How does U.S. energy production compare to other countries?
- How will the U.S. sustain its energy production?
- How much longer will the U.S. burn coal?
- What is the “smart grid?”
- What is the fear factor around nuclear plants?
- Does the U.S. use more or less “green energy” than other countries?
- Should I buy a hybrid car and put solar panels on my house?

This seminar is perfect for anyone who:

- Wants to learn the basics of the energy industry
- Is a new hire in the energy industry
- Is a non-technical energy company employee
- Is a technical energy company employee who wants to expand their industry perspective
