'Entry-Level Wage: Vary by Industry

Heating Ventilation and Air Conditioning (HVAC) systems manage the temperature, humidity, and overall air quality in residential and commercial buildings. Climate controlled environments make it possible for transportation and storage of food, medications and other perishable items.

HVAC technicians work with heating, air conditioning, or refrigerations systems. Technicians can specialize in specific types of HVAC equipment: water-based heating systems, solar panels, or commercial refrigeration.

NCCER develops standardized construction and maintenance curriculum and assessments with portable credentials. These credentials are tracked through NCCER's Registry System that allows organizations and companies to track the qualifications of their craft professionals and/or check the qualifications of possible new hires. NCCER's Registry System also assists craft professionals by maintaining their records in a secure database.

FOR MORE INFORMATION:

Please contact the Continuing Education Department at LSCCE@LoneStar.edu for more information.

'Wage Data' is based on annual salaries from Bureau of Labor Statistics, U.S. Department of Labor, Occupational Employment Statistics, 2016, www.bls.gov/oes.
