To access the library’s article databases from home, follow these steps:

1. Using your browser, go to the Lone Star College – Montgomery Library’s home page at this address:
   
   http://montgomery.lonestar.edu/library

2. Click “Article Databases.”

3. In either the Title or Subject list, choose a database from one of the drop-down menus.

4. Click “Go.”

5. When you see the screen below, type the 14-digit barcode number (without spaces) on the back of your student ID. That number starts with 23136.

6. Click “Login.”

7. You should then end up at the opening screen of the database you chose.

**NOTE:** Your student ID **must** be activated before this will work. To activate your ID, either call 936-273-7387 or bring your card to the Circulation Desk in the library, the desk where you check out books. If you need help, call the Reference Desk at 936-273-7390.
