Beneath each academic division below is a list of its subjects. Under this list are the librarians responsible for Collection Development and Faculty Liaison services for these subjects. “Collection Development” means acquiring information resources (e.g., books, magazines, journals, videos, CDs, paper, electronic) for a subject. “Liaison Services” include, for example, teaching students how to find information for assignments in particular subjects. Please note that all librarians can help your students answer questions about any of these subjects.
