Smartphone Email Setup

If you have a Smartphone that supports Microsoft Exchange Server, you can set up your phone to receive your LSCS email. Just use the settings for your Smartphone below. These settings are provided for your information only; we do not support hardware that does not belong to the college.

Windows Mobile 6

- Start > Programs > Active Sync > setup your device to sync with it
- Exchange server: https://webmail.lonestar.edu/exchange
- Username: same as you use for your computer login (e.g. jdoe)
- Password: same as you use for your computer login
- Domain: lscs.prv
- Encryption or Use SSL? Check this option or select Yes

iPhone

- Select the Microsoft Exchange option
- Email: your current email (e.g. john.doe@lonestar.edu)
- Username: same as you use for your computer (e.g. jdoe)
- Password: same as you use for your computer
- Domain: lscs.prv
- Use SSL? Yes

Once you put in this information and hit Next on the iPhone, it will attempt to automatically get the rest of the information. This will fail. It will then ask for a server address.

- Server: https://webmail.lonestar.edu

Android

- From the Menu button select Settings > Accounts & sync > Add Account > Exchange ActiveSync.
- Email address: your current email (John.doe@lonestar.edu)
- Server address: webmail.lonestar.edu
- Domain: lscs.prv
- Username: same as you use for your computer (e.g. jdoe)
- Password: same as you use for your computer login
- Check the box: This server requires an encrypted SSL connection? Yes
Blackberry

- **Email Setting > Add > Other** *(It will then ask for user name and password.)*  Enter
  username ex (LSCS\Username) and password. *(It will try to connect and then fail)*
- After the failure to connect the screen will display 2 radio buttons. Select **let me
  manually input the data**.
- Outlook web access url: **https://webmail.lonestar.edu/exchange**
- Mailbox name: user.name@lonestar.edu (john.doe@lonestar.edu)
- Username: lscs\username (lscs\jdoe)
- Password: same as you use for your computer

If it doesn’t connect after this, you need to enable http-s forwarding. To do this, follow these steps.

- From the home screen choose **Options**
- Select **Security Options**
- Select **TLS**
- Choose **Yes** under Allow HTTPS Redirections.

**If you need further assistant please contact your service provider.**

- Email Server Type: **Exchange ActiveSync**
- ActiveSync or Exchange Server: **webmail.lonestar.edu**
- Incoming Mail Server: **webmail.lonestar.edu**
- Outgoing Mail Server: **webmail.lonestar.edu**
- Domain: **lscs.prv**
- Email: username@lonestar.edu (ex. john.doe@lonestar.edu)
- Username: same as you use for your computer (e.g. jdoe)
- Password: same as you use for your computer
