

Psychology and Me Report

This assignment will give you the opportunity to explore the field of psychology and how it can apply to your own life. Write a one page (at least 250 words), double spaced, 12 point type paper answering these two questions with at least one paragraph for each question. You can click on Review and check Word Count in Word.

- 1) If you were a psychologist, what specialty would you choose? Explain why you would like that area. You may wish to review some of the 54 different divisions in psychology at the American Psychological Association (APA) website: <http://www.apa.org/about/division/index.aspx> or review Appendix C in the back of the textbook. Select at least one area of interest and discuss.
- 2) Think about the career you are preparing yourself for now. If you are undecided, select a future job and suggest at least three ways psychology could be used to benefit that field.
