

# Imagine a place where...

## ❖ *Learning knows no boundaries*

Universities grow far beyond their campuses to convene and collaborate in order to provide students with unduplicated bachelor's and master's degrees, continuous learning opportunities and coordinated student services.

## ❖ *Learning is a highway with many points of entry*

Some students are at the beginning of a well mapped out journey, with their freshman and sophomore-level courses complete and a degree plan in place; some arrive with a shoe box full of transcripts and need help finding out where they are and which direction to go to achieve their goals; some yearn for a promotion or career change to advance them on their journey, but lack the needed education or skills to be competitive; and some need to get to their educational destination but are concerned about all the potential pit-stops of an existing job or family situation that make it inconvenient or unaffordable to attain their goals.

## ❖ *Learning is a lifelong endeavor*

From short-term intensive training to post graduate courses and degrees and professional development, LSC-University Center at Montgomery is accessible to businesses and individuals to upgrade and keep their job skills current and vibrant.

Selected text from [The History of the NHMCCD - A Silver Anniversary Commemorative](#), 1998.

LSCS and the partner universities provide equal employment, admission and educational opportunities without regard to race, color, religion, national origin, sex, age, or disability.

# MAP

❖ *Learning is an ever-evolving process*

Interactive technologies extend teaching and learning beyond chalkboards and classrooms, and students learn telecommunications skills they take back to the local and even global workforce.

❖ *Learning means good business*

Collaboration with business and industry creates an alliance of public and private members for common development, technology transfer, joint training efforts, friendly “tryout” locations, and intellectual dialogue for continuous business competitiveness and productivity improvement.
