

Psychology

The Bachelor of Science is a general program in psychology intended to give the student a thorough grounding in the academic discipline.

The diversity of activities associated with psychology attracts students who have a wide range of personalities. It should not be too surprising to discover that psychology majors can and do engage in a wide variety of occupations. Many students enter the job market immediately after graduation, but many other students pursue additional education obtaining a master's or doctoral degree. Those students entering the job market with an undergraduate degree may enter occupations associated with social services such as residential youth counselors or occupational therapists. They may also enter business related services such as sales, marketing representatives, or human resources.

Students may be eligible for an Associates degree from Lone Star College System after their first two years of study. Please see your Lone Star College advisor to check the requirements or refer to your LSC-Catalog pages 76-77. A maximum of 66 hours may transfer from a community college. The BS degree requires a minimum of 120 credit hours.

The staff members in the Academic Student Services Office at the UC assist all students in determining which program of study to pursue. This includes providing information about the variety of programs available, reviewing transcripts to aid in identifying any courses to be completed before entering the program of choice, and serving as liaison between the student and university program representatives. Students who have already earned an associate's degree or have a substantial number of college academic credit hours should contact the Academic Student Services Office for advising and to begin the transfer admission process for the university offering the degree program they desire to pursue.

This brochure was created by the Academic Student Services Office based on information from the partner university.
