Lone Star College Employees:

I wanted you to know that we are paying close attention to the situation with the Coronavirus. Each campus president and vice chancellor have been asked to prepare contingency plans just in case.

But, we will address this as a system if we believe the virus poses a threat to our students, employees or operations.

As a precaution, we have cancelled all study abroad trips for this semester and are exploring options for our students.

We still have over two months before graduation ceremonies and will proceed with contingency plans.

In the meantime, it would be helpful if faculty could remind students how important basic hygiene is during this period.

We’ve been through this before with the Swine flu so we’ll monitor the situation and take the appropriate actions when necessary.

Below is an article on the virus if you need additional information.

Regards,

Steve Head
Chancellor

How to Prepare for the Coronavirus
