What is the name of this muscle?

Triceps brachii
What are the brain membranes called?
What is the name of these muscles?

Latissimus dorsi
What is the name of this muscle?

Brachioradialis
What is this called?

Cell body (of neuron)
What is the name of this muscle?

Rectus abdominis
What is this region called? **Occipital lobe**
What is the name of this muscle?

Pectoralis major
What is the name of these muscles?

Deltoids
What are these called?

Nodes of Ranvier
What is the name of this muscle?

Biceps brachii
What is this deep groove called? Longitudinal fissure
What is this whole long thing called? axon
What are these called?

Cerebral hemispheres
What is the action of the rectus abdominis group?

Compress Abdominal region
What is the name of this muscle? **semimembranosus**
What is the name of muscle 14? Adductor magnus
What is this nerve called?

ulnar nerve
What is this part called?

Ventral Root
What is this shallow groove called?

Central sulcus
Which muscles make up the quadriceps group...?

Rectus femoris
Vastus lateralis
Vastus medialis
Vastus intermedius
What is the name of muscle 4?

Gluteus medius
What is this called?

dendrite
What are these called?

Thoracic Spinal nerves
What are these called?

Cervical Spinal nerves
What is this region called? Parietal lobe
What are these called?

Schwann cells (provide myelin sheath for Faster signal transduction)
What is this called?
cerebellum
What is this deep groove called?

Longitudinal fissure
What is the name of muscle 11a?

Rectus femoris
What are these?

Olfactory Nerves - CNI
What is this?

thalamus
Gluteus maximus does what action...?

Extends

thigh
Which muscles make up the adductor group...?

Adductor magnus
Gracilis
Adductor longus
What is the name of these muscles?

Zygomaticus
What is the name of this muscle?

Gracilis

Medial view
What is this part called?
What is this region called? Pons
Which muscles make up the hamstring group...

Biceps femoris
Semimembranosus
Semitendinosus
What is this?

Patellar ligament
What are these?

Dendrites
The quadriceps group does what action...?

Extends leg
Name this muscle.

Occipitalis
What is the anatomical name of the joint between the 2 hip bones and the sacrum is...?

sacroiliac joint
What is the name of this muscle?

Masseter
What is the name of this muscle?

Vastus lateralis

anterior view - Left
What are these?

Nodes of Ranvier
What is the anatomical name of the shoulder joint?

Glenohumeral joint
Name this muscle.

Orbicularis oculi
The adductor group does what action...?

Adducts the leg
Name muscle #20. Frontalis
What is the name of this muscle?

Vastus intermedius

anterior view- Left
