What is the action of this muscle?

Flexion of forearm
What is this called?

Cerebrum
What are these?

Schwann cells
What is the action of this muscle?

Extension of forearm
What is this nerve called?

femoral nerve
What is the name of this muscle? Serratus anterior
What is this nerve called?

median nerve
What is this region called? Pons
What is this nerve called?

Radial nerve
What is this part of the cell called?
What is this nerve called?

ulnar nerve
What is the name of this muscle?

brachialis
What is the action of these muscles?

Abducts arm
What is this region called? Frontal lobe
What are these folds called?
What are these called?

Sacral Spinal nerves
What is the name of this muscle?

diaphragm
What are the membranes of the CNS called?
What is this part called?

Dorsal Root ganglion
What is this region called?

Occipital lobe
What are these called?

Lumbar Spinal nerves
What is the name of this muscle? Trapezius
What is this part called? Central canal
What is the action of the trapezius?

Rotation of scapula
Which muscle elevates the mandible?

masseter
Which muscle closes the eye?

Orbicularis oculi
What is the name of this connective tissue?

Linea alba
What is this shallow groove called? Central sulcus
What is this?

Quadriceps tendon
What is the name of this structure?

Calcaneal (Achilles) tendon

Lateral view
What is this whole thing called?

Spinal cord
What is the name of this muscle?

sartorius

Lateral view
What is the name of this muscle?

Gastrocnemius

Lateral view
What is the name of this muscle?

Adductor longus

Medial view
What is the name of muscle 18?

Biceps femoris
What is the name of this muscle?

Semitendinosus

Posterior view
What are these folds called?
What is the name of muscle 3?

Gluteus maximus
Name this muscle.
What is this region called? Temporal lobe
What is this?

Pituitary gland
What are these?

Optic nerves - CNII
What is this region called?

Medulla oblongata
What is this?

thalamus
What is the name of this muscle?

Temporals
The hamstring group does what action...?

Flexes

Leg
What is the action of this muscle?

Closes mouth
What is the name of this muscle?

Sternocleido-mastoid
What is this region called?

Frontal lobe
Name this muscle.

Orbicularis oris
This bridge of white matter is called **Corpus callosum**.
The fibrocartilage disk between the anterior regions of the L & R coxal bones is the...?

Pubic symphysis
What is this? hypothalamus
What is the anatomical name of the joint of the jaw?

Temporomandibular joint
What are these?

Olfactory Nerves CNI
What is the name of this muscle group?

Scalenes
