What are these?
What is this part of the cell called?
What are the brain membranes called?

Meninges
What is this called?
cerebellum
What are these called?

Cerebral hemispheres
What are these?

Nodes of Ranvier
What is this region called?

Insula
What is this shallow groove called?

Central sulcus
This bridge of white matter is called **Corpus callosum**.
What is this region called?

Temporal lobe
What is this region called?

Occipital lobe
What is this region called?

Medulla oblongata
What are these folds called?
What is this region called? Parietal lobe
What are these?

Optic nerves - CNII
What is this called?
cerebrum
What is this extension called?
What is this region called?

Frontal lobe
What are these?

Schwann cells
What is this? hypothalamus
What is this?

thalamus
What is this?

Pituitary gland
What are these?

Olfactory Bulbs - CNI
What is this deep groove called?

Longitudinal fissure
What is this region called? Pons
