The following course description was revised:

**ENGR 2405 - Electrical Circuits I**

3 Credits (3 hrs. lec., 3 hrs. lab) Principles of electrical circuits and systems. Basic circuit elements (resistance, inductance, mutual inductance, capacitance, independent and dependent controlled voltage, and current sources). Topology of electrical networks; Kirchoff’s laws; node and mesh analysis; DC circuit analysis; operational amplifiers; transient and sinusoidal steady-state analysis; AC circuit analysis; first- and second-order circuits; Bode plots; and use of computer simulation software to solve circuit problems. Laboratory experiments supporting theoretical principles involving DC and AC circuit theory, network theorems, time, and frequency domain circuit analysis. Introduction to principles and operation of basic laboratory equipment; laboratory report preparation. Prerequisites: PHYS 2425 and MATH 2414 and MATH 2320. Corequisites: MATH 2320

The text for “Student Absence on Religious Holy Days” was updated to read as follows (effective Spring 2015):

### Student Absence on Religious Holy Days

A student needing to be absent from class to observe a religious holy day must submit a written notice to each instructor whose class falls on that day. Written notice must be provided to the instructor no later than the second class meeting. The student may deliver the written notice personally to the instructor by receipted delivery, or in the alternative, the student may forward the written notice to the instructor by receipted courier delivery or by United States certified mail, return receipt requested, sent in enough time so as to be delivered no later than the fifteenth day after the first day of the semester. Upon receipt of a timely written notice, the student’s attendance record will properly reflect an excused absence.

A student who is absent from classes for the observance of a religious holy day shall be allowed to complete an assignment or take an examination scheduled for that day within a reasonable time after the absence. A student who is excused under this section may not be penalized for the absence; however, the instructor may appropriately respond if the student fails to satisfactorily complete any missed assignment and/or examination. If a student and an instructor disagree about the nature of the absence for the observance of a religious holy day as defined [above], or if there are similar disagreements about whether the student has been given a reasonable time to complete any missed assignments or examinations, either the student or the instructor may request a ruling from the Chief Student Services Officer or his or her designee. The student and instructor shall abide by such ruling.

The information for “Health Information Technology” has been updated to read as follows (effective Spring 2015):

HEALTH INFORMATION TECHNOLOGY

Program Description
The health information technology (HIT) associate of applied science degree is designed to prepare graduates for entry level employment as health information technicians. The associate of applied science degree program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education Program accreditation allows AAS degree graduates to apply for certification examination to become Registered Health Information Technicians (RHIT). Registered health information technicians perform technical medical record functions vital to the operation of the organization, including analyzing, coding, and health record evaluation. Registered health information technicians process, maintain, complete and report health information data for reimbursement, facility planning, marketing, risk management, utilization management, quality assessment and research. Graduates may be employed in a variety of settings including hospitals, health maintenance organizations, and other health care facilities.

The general education core will transfer to a variety of colleges and universities. Contact a counselor or faculty member at any of the colleges/universities for specific information and to obtain the recommended sequencing of courses.

To meet graduation requirements for any of the certificate or degree programs in the health information technology department, students must attain a grade of “C” or better in each major and general education course. Courses with grades less than a “C” must be repeated.
Admission Criteria: AAS Degree
In order to be considered for admission to the HIT program, students must pass the Texas Success Initiative. Unless students are TSI exempt, they must take the TSI Assessment and receive college-level placement in reading, writing, and completion of MATH 0310 or higher. Students must submit an application that can be found on the college’s website under the HIT department. Prospective students may submit the form online or pick up at Lone Star North Harris Winship 174 and bring the completed packet to the department. Applications are accepted from May 1st to July 30 for fall entry into the program. Students wishing to begin the program at any other time besides the fall may take some of the support classes or prerequisites for the program such as BIOL 2401 Human Anatomy and Physiology I or HITT 1305 Medical Terminology.

Applicants seeking admission into the health information technology AAS degree program and must successfully pass a criminal background check. A drug screen may also be required based on terms of our clinical affiliation agreement. Information on approved vendors will be provided by the program director. Students may be required to show proof of immunizations such as tetanus and MMR (mumps, measles, rubella). Students may also be required to document negative results from a tuberculosis test. Applicants must cover the cost of the background check, immunizations and drug screen if required by clinical affiliates.

Coding Certificate Description
The coding certificate is currently approved by the Council on Certification of the American Health Information Management Association (AHIMA). In addition, program accreditation allows coding certificate graduates to apply for certification examination to become a Certified Coding Associate (CCA). Registered health information technicians perform technical medical record functions vital to the operation of the organization, including analyzing, coding, and health record evaluation. Registered health information technicians process, maintain, complete and report health information data for reimbursement, facility planning, marketing, risk management, utilization management, quality assessment and research. Graduates may be employed in a variety of settings including hospitals, health maintenance organizations, and other health care facilities.

The general education core will transfer to a variety of colleges and universities. Contact a counselor or faculty member at any of the colleges/universities for specific information and to obtain the recommended sequencing of courses.

To meet graduation requirements for any of the certificate or degree programs in the health information technology department, students must attain a grade of “C” or better in each major and general education course. Courses with grades less than a “C” must be repeated.

Admission Criteria: Coding Certificate
Admission to the certificate program requires completion of an application found on the LSC-North Harris Web site. Applications are accepted March 1 to May 1st for fall entry. Applicants seeking admission into these programs must successfully pass a criminal background check. Students may be required to show proof of immunizations such as tetanus and MMR (mumps, measles, rubella). Students may also be required to document negative results from a tuberculosis test. Applicants must cover the cost of the background check, immunizations and drug screen if required by clinical affiliates. Admission requires the following:

1. College-level reading and writing readiness skill
2. Completion of ENGL 0305 or ENGL 0365 & ENGL 0307 or ENGL 0375 or higher
3. Completion of MATH 0310 or higher

The coding certificate prepares the technician to assign a code to a medical diagnosis or procedure. Medical coders consult classification manuals and rely on their knowledge of disease processes to assign codes. After completion of the certificate, graduates are eligible to sit for a national certification exam administered by AHIMA and become certified as a certified coding associate (CCA). The coding certificate program begins every fall semester. Students wishing to begin the certificate program at any other time besides the fall may take some of the core courses or prerequisites for the program.

Employment of medical records and health information technicians is expected to increase by 18 percent through 2016 according to the Bureau of Labor Statistics. This is faster than the average for all occupations because of rapid growth in the number of medical tests, treatments, and procedures that will be increasingly scrutinized by health insurance companies, regulators, courts, and consumers. Technicians will be needed to enter patient information into computer databases to comply with Federal legislation mandating the use of electronic medical records.

Students admitted to the program will be required to pay liability insurance during the semesters involving
off-campus practicums or internships. At some facilities, students may be required to successfully pass a criminal background check and drug screen, as well as to show proof of immunizations such as tetanus and MMR (mumps, measles, rubella). Students may also be required to document negative results from a tuberculosis test. These costs are borne by the student.

The following courses were added (effective Fall 2014):
ENGR 2308 - ENGINEERING ECONOMICS
3 Credits (3 hrs. lec.) Methods used for determining the comparative financial desirability of engineering alternatives. Provides the student with the basic tools required to analyze engineering alternatives in terms of their worth and cost, an essential element of engineering practice. The student is introduced to the concept of the time value of money and the methodology of basic engineering economy techniques. The course will address some aspects of sustainability and will provide the student with the background to enable them to pass the Engineering Economy portion of the Fundamentals of Engineering exam. (149999510) Prerequisites: MATH 2413

ENGR 2333 - ELEMENTARY CHEMICAL ENGINEERING
3 Credits (3 hrs. lec.) This course is the foundation for nearly all future chemical engineering courses and analysis. A strong foundation in mathematics, physics, and chemistry is required for application to the solution of problems in industrial chemistry. Students will receive an introduction to chemical engineering calculations, unit equations, process stoichiometry, material and energy balances, and states of matter, and will apply the laws of conservation of mass and energy to reacting and non-reacting, simple and complex chemical systems. Prerequisites: ENGR 1201 and CHEM 1412 and MATH 2414 and PHYS 2425

ENGR 2334 - CHEMICAL ENGINEERING THERMODYNAMICS I
3 Credits (3 hrs. lec.) Fundamental concepts of energy and thermodynamics (e.g., temperature, thermodynamic equilibrium, and heat) will be introduced; the course emphasizes techniques in the application of the fundamentals of thermodynamics to various processes as they frequently occur in chemical and biomolecular engineering. Provides the basic skills and tools necessary in designing and analyzing real-life engineering systems. Serves as preparation for other
advanced courses in thermodynamics, energy conversion, heat transfer, etc. (1407015210) Prerequisite: MATH 2415

The following course was added (effective Spring 2015):

ENGR 2406 - INTRODUCTION TO DIGITAL SYSTEMS
4 Credits (3 hrs. lec., 3 hrs. lab) Introduction to theory and design of digital logic, circuits, and systems. Number systems, operations and codes; logic gates; Boolean Algebra and logic simplification; Karnaugh maps; combinational logic; functions of combinational logic; flip-flops and related devices; counters; shift registers; sequential logic; memory and storage. Basic laboratory experiments supporting theoretical principles presented in ENGR 2306 involving design, construction, and analysis of combinational and sequential digital circuits and systems, including logic gates, adders, multiplexers, encoders, decoders, arithmetic logic units, latches, flip-flops, registers, and counters; preparation of laboratory reports. Prerequisites: MATH 1314

Page 260
The following courses were added (effective Spring 2015):

ESOL 0391 - ESOL GRAMMAR I
3 Credits (3 hrs. lec., 1 hr. lab.) This course is designed to help students with very little English proficiency to understand and use basic English grammar correctly in both written and spoken communication. Students develop control of fundamental structures including basic tenses, parts of speech and simple sentences. This course carries institutional credit but will not transfer and will not be used to meet degree requirements. Placement by exam. (3201085712) Prerequisite: placement by testing

ESOL 0392 - ESOL GRAMMAR II
3 Credits (3 hrs. lec., 1 hr. lab.) This course continues to develop the existing knowledge of grammatical structures and helps students to acquire new ones. Emphasis is placed on the complex verb tenses, passive voice, and compound sentences. This course will help students apply grammatical accuracy to their writing and speaking. This course carries institutional credit but will not transfer and will not be used to meet degree requirements. (3201085712) Prerequisite: ESOL 0391 or Placement by testing.

ESOL 0393 - ESOL GRAMMAR III
3 Credits (3 hrs. lec., 1 hr. lab.) This course is designed to help students with very little English proficiency to understand and use basic English grammar correctly in both written and spoken communication. Students develop control of fundamental structures including basic tenses, parts of speech and simple sentences. This course carries institutional credit but will not transfer and will not be used to meet degree requirements. Placement by exam. (3201085912) Prerequisite: ESOL 0392 or Placement by testing.

ESOL 0394 - ESOL GRAMMAR I
3 Credits (3 hrs. lec., 1 hr. lab.) Students continue the study of grammatical structures required for quality oral and written academic communication. They develop skills in understanding form, meaning and usage of complex grammatical structures including gerunds and infinitives, conditionals and complex sentences with noun, adjective and adverb clauses. This course carries institutional credit but will not transfer and will not be used to meet degree requirements. (3201085912) Prerequisite: ESOL 0393 or Placement by testing

ESOL 0395 - ESOL GRAMMAR V
3 Credits (3 hrs. lec., 1 hr. lab.) Focuses on Standard English grammar usage for academic purposes. Open only to non-native speakers. This course carries institutional credit but will not transfer and will not be used to meet degree requirements. (3201085712) Prerequisite: ESOL 0394 or Placement by testing.

GEOL 1403 - PHYSICAL GEOLOGY
4 Credits (3 hrs. lec., 3 hrs. lab.) This course explores the theory of geologic processes including a study of physical forces that shape the earth and all its landforms. Special emphasis is given to the origins of minerals and rocks, volcanoes, earthquakes, structures, plate tectonics and other geologic processes. Lab exercises include mineral identification and differentiation of the major rock types, use of topographic maps and aerial photographs and interpretation of geologic data. Optional field trips help students explore and discover links between classroom discussions and life experiences. Participation in field trips is highly recommended. (4006015403) Prerequisites: ENGL 0305 or ENGL 0365 or ENGL 0115 AND ENGL 0307 or ENGL 0375 or ENGL 0117 OR higher level course (ENGL 1301) OR placement by testing. ENGL 0309 or ENGL 0310 also meets prerequisite; MATH 0308
The above text should now read as follows (effective Fall 2014):
GEOL 1403 - PHYSICAL GEOLOGY
4 Credits (3 hrs. lec., 3 hrs. lab.) Physical Geology is a basic science course that focuses on Earth, including its composition, processes of change, history and the tools and methods used to study it. (4006015403) Prerequisites: College level readiness in reading AND writing; MATH 0308
The following text was revised:
GEOL 1404 - HISTORICAL GEOLOGY
4 Credits (3 hrs. lec., 3 hrs. lab.) A geological history of the earth stressing fossils, stratigraphy and plate tectonics.
Emphasis is placed on environments and the succession of geologic events since the origin of the earth. Labs review rocks and maps, with exercises in fossil identification, stratigraphic correlation and cross cutting relationships. Participation in field trips is highly recommended. (4006015403) Prerequisites: GEOL 1403 OR GEOL 1405 OR department approval; ENGL 0305 or ENGL 0365 or ENGL 0115 AND ENGL 0307 or ENGL 0375 or ENGL 0117 OR higher level course (ENGL 1301) OR placement by testing. The above text should now read as follows (effective Fall 2014):

**GEOL 1404 - HISTORICAL GEOLOGY**

4 Credits (3 hrs. lec., 3 hrs. lab.) A comprehensive survey of the history of life and major events of the physical development of Earth as interpreted from rocks and fossils. Prerequisites: College level readiness in reading AND writing; MATH 0308

The following text was revised:

**GEOL 1405 - ENVIRONMENTAL GEOLOGY**

4 Credits (3 hrs. lec., 3 hrs. lab.) An analysis survey of geologic processes, their influence on people and the influence of human activities on the environment. Topics include natural resources, geologic hazards, waste disposal, surface and groundwater pollution, air pollution, land-use planning, environmental law, and the determination of risk assessments based on remote sensing techniques, field observations and their economic impact. Lab exercises include groundwater flow, environmental pollution, geologic hazards, geologic resources and land use planning. Participation in field trips is highly recommended. (0301035301) Prerequisites: ENGL 0305 or ENGL 0365 or ENGL 0115 AND ENGL 0307 or ENGL 0375 or ENGL 0117 OR higher level course (ENGL 1301) OR placement by testing. The above text should now read as follows (effective Fall 2014):

**GEOL 1405 - ENVIRONMENTAL GEOLOGY**

4 Credits (3 hrs. lec.) A survey of the forces, including humans, that shape our physical environment, and how they affect life on Earth. Introduction to the science and policy of global and regional environmental issues, including pollution, climate change, and sustainability of land, water, and energy resources. (0301035301) Prerequisites: College level readiness in reading AND writing; MATH 0308

The following text was revised:

**GEOL 2307 - GEOLOGY OF TEXAS**

3 Credits (3 hrs. lec.) The topography, physiography, structure, geologic history and mineral deposits of Texas. Plate tectonics regional correlations and local phenomena are emphasized. Participation in field trips is highly recommended. (4006015503) Prerequisites: GEOL 1404 or department approval; ENGL 0305 or ENGL 0365 or ENGL 0115 AND ENGL 0307 or ENGL 0375 or ENGL 0117 OR higher level course (ENGL 1301) OR placement by testing. The above text should now read as follows (effective Fall 2014):

**GEOL 2307 - INTRODUCTION TO FIELD GEOLOGY**

3 Credits (3 hrs. lec.) Primarily a field-based experience in geology for visiting sites that serve as examples of a variety of geological phenomena. Field trip locations will include sites that display the processes that shape the landscape, that result in the deposition or formation of rock units and mineral resources, and that deform the Earth’s crust. (4006015503) Prerequisites: College level readiness in reading AND writing; MATH 0308

**MATH 1324 - FINITE MATHEMATICS**
3 Credits (3 hrs. lec.) Matrices, systems of equations, linear programming, the simplex method, probability, and mathematics of finance. Primarily for business majors and liberal arts students. (2703015219) Prerequisites: Math 0310 OR placement by testing; ENGL 0305 or ENGL 0365 OR higher level course (ENGL 1301), OR placement by testing; Corequisite: ENGL 0309
The above text should now read as follows (effective Fall 2014):

**MATH 1324 - MATHEMATICS FOR BUSINESS & SOCIAL SCIENCE**
3 Credits (3 hrs. lec.) Applications of common algebraic functions, including polynomial, exponential, logarithmic, and rational, to problems in business, economics, and the social sciences are addressed. The applications include mathematics of finance, including simple and compound interest and annuities; systems of linear equations; matrices; linear programming; and probability, including expected value. (2703015219) Prerequisites: Math 0310 OR placement by testing; ENGL 0305 or ENGL 0365 OR higher level course (ENGL 1301), OR placement by testing; Corequisite: ENGL 0309

The following text was revised:

**MATH 1325 - ELEMENTS OF CALCULUS WITH APPLICATIONS**
3 Credits (3 hrs. lec.) A one-semester calculus course for non-science majors. Topics include limits, continuity, rates of change, differentiation and integration techniques and applications, calculus of the logarithmic and exponential functions and partial derivatives. (2703015319) Prerequisites: MATH 1314 or MATH 1324 or placement by testing;
ENGL 0305 or ENGL 0365 OR higher level course (ENGL 1301), OR placement by testing

The above text should now read as follows (effective Fall 2014):

MATH 1325 - CALCULUS FOR BUSINESS & SOCIAL SCIENCES
3 Credits (3 hrs. lec.) This course is the basic study of limits and continuity, differentiation, optimization and graphing, and integration of elementary functions, with emphasis on applications in business, economics, and social sciences. This course is not a substitute for MATH 2413, Calculus I. (2703015319) Prerequisites: MATH 1314 or MATH 1324 or placement by testing; College level readiness in reading

The following text was added (Spring 2015):

MSSG 1105 - HYDROTHERAPY/ THERAPEUTIC MODALITIES
1 Credit (2 hrs. lab.) The use of accepted hydrotherapy and holistic healthcare modalities of external application of temperature for its reflexive effect. Meets the minimum 20-contact-hour requirement for licensure. Students must complete an application process including an online application. Prerequisites: None

MSSG 1109 - HEALTH & HYGIENE
1 Credit (1 hr. lec., 1 hr. lab.) The study of safety and sanitation practices including universal precautions. The importance of proper body mechanics, maintaining a healthy lifestyle, maintaining the massage environment, and the advantage of therapeutic relationships is also included. Meets the minimum 20-contact-hour requirement for licensure. Students must complete an application process including an online application. Prerequisites: None

MSSG 1207 - BUSINESS PRACTICES & PROFESSIONAL ETHICS
2 Credits (2 hrs. lec., 1 hr. lab.) The study of physical and financial office practices and marketing. Includes ethical practices for massage therapists as established by law or regulatory agency. Meets the minimum 45-contact-hour requirement for licensure. Students must complete an application process including an online application. Prerequisites: None

MSSG 1411 - MASSAGE THERAPY FUNDAMENTALS I
4 Credits (2 hrs. lec., 6 hrs. lab.) Introduction to the theory and the application of skills necessary to perform basic massage skills and chair massage. This meets the minimum 125-contact-hour requirement for licensure. Students must complete an application process including an online application. Prerequisites: None

MSSG 1413 - ANATOMY & PHYSIOLOGY FOR MASSAGE
4 Credits (3 hrs. lec., 2 hrs. lab.) In-depth coverage of the structure and function of the human body. Includes cell structure and function, tissues, body organization, and the integumentary, skeletal, muscular, nervous, and endocrine systems. Emphasizes homeostasis/wellness care. Meets the minimum 75-contact-hour requirement for Anatomy and Physiology for licensure. Students must complete an application process including an online application. Prerequisites: None

MSSG 2286 - INTERNSHIP - MASSAGE THERAPY
2 Credits (8 hrs. ext.) A work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the college and the employer. Students must complete an application process including an online application. Prerequisites: None

MSSG 2311 - MASSAGE THERAPY FUNDAMENTALS II
3 Credits (2 hrs. lec., 4 hrs. lab.) A continuation of Massage Therapy Fundamentals I. Emphasizes specialized techniques and assessment of client needs to identify a specific plan of care. Completes the requirements for Massage Techniques for licensure. Students must complete an application process including an online application. Prerequisites: None

MSSG 2313 - KINESIOLOGY FOR MASSAGE
3 Credits (3 hrs. lec., 1 hrs. lab.) Applied study of human kinesiology. Muscle movements and dysfunctions will be discussed and palpated. Includes theory and practice of functional muscle testing. Meets the minimum 50-contact-hour requirement for licensure. Students must complete an application process including an online application. Prerequisites: None

MSSG 2314 - PATHOLOGY FOR MASSAGE
3 Credits (3 hrs. lec.) General discussion of pathologies as they relate to massage therapy. Includes universal precautions and their management in professional practice. Also covers etiology, signs, symptoms, and the physiological and psychological reactions to disease and injury. Meets the minimum 40-contact-hour requirement for licensure. Students must complete an application process including an online application. Prerequisites: None
