Designed to meet the oil and gas industry’s need for an educated and prepared workforce, Lone Star College is now offering an Oil and Gas Drilling & Floorhand Roustabout Pre-Apprentice program. Classroom and lab training will provide entry-level knowledge and skills needed for workers in the drilling and exploration sector of the oil and gas industry. Upon successful completion of the Floorhand Roustabout program four nationally recognized certifications will be provided by the International Association of Drilling Contractors (IADC®).

Lone Star College is the first provider to offer the Floorhand Roustabout Pre-Apprentice fast-track career certificate that has been accredited by the International Association of Drilling Contractors (IADC), for the Knowledge, Skills and Abilities (KSA) competencies in relation to the Workforce Attraction & Development Initiative (WADI) Project. The WADI project was a world-wide effort to attract and provide the industry with greater number of screened, rig-ready new hire candidates. The collective courses in our Floorhand Roustabout Fast-track career certificate program have been approved to provide the training vital for entry level oil and gas personnel.

"I am a Navy veteran and single parent working to provide a good life for my family. I took the Floorhand Roustabout program back in 2013, and since completion of the program I have been able to improve the quality of life for my daughter and myself. I was able to remain an active participant, even during the downturn. Taking this program was the best and most rewarding decision I ever made in my career."

Kristin Blissit

This certificate will earn 14 credit hours towards a field service technician degree.
