The Health Information Technology (HIT) associate of applied science degree is designed to prepare graduates for entry level employment as health information technicians.

Registered health information technicians perform technical medical record functions vital to the operation of the organization, including analyzing, coding, and health record evaluation. Registered health information technicians process, maintain, complete and report health information data for reimbursement, facility planning, marketing, risk management, utilization management, quality assessment and research. Graduates may be employed in a variety of settings including hospitals, health maintenance organizations, and other health care facilities.

The general education core will transfer to a variety of colleges and universities. Contact a counselor, academic advisor, or faculty member at any of the colleges/universities for specific information and to obtain the recommended sequencing of courses.
