PUBLISH QUIZ GRADES TO GRADES TOOL

If the General Properties of the quiz was not set to allow automatic export to grades and allow attempt to be set as graded immediately upon completion, student grades will not be shown in the Grades tool. After correcting these settings, you may still need to manually publish the grades to push them into the Grades tool. See Quiz Properties, Figure 1

Publish the grades

1. Go to Assessments -> Quizzes. Figure 1

2. Click the dropdown menu next to the quiz title. Then click Grade. Figure 2 and 3

3. Click the Published icon located in the upper right of the list of attempts. This will select the attempts. Then click the Update button. Figure 4
