The Mobile/Web Application Development program prepares IT students for programming positions in the areas of mobile/web application development. Students who successfully complete this program may find job opportunities in business, marketing, education, health care, many levels of government and entrepreneurship.

This program will train students in developing applications that will allow business to consumer, consumer to consumer, and business to business e-commerce interactions on multiple mobile device platforms. Students will learn a variety of programming languages and UX development techniques including prototyping and user interaction design.
